ABOUT ME

Senior Software Engineer with **6+ years** of experience building and modernising large-scale, distributed backend systems across **FinTech, airline retail, and education sectors.** Expert in **Java 17+** and **Spring Boot**, with a track record of owning microservices end-to-end, from architectural design to production stability. Experienced in **cloud-native infrastructure (AWS, Docker, Kubernetes)**, **securing distributed systems (OAuth2, Keycloak)**, and delivering in **regulated domains such as core banking and airline retail.** Passionate about **cybersecurity, AI-native development workflows,** clean code, and fostering high engineering standards. **Aspiring Software Architect focused on designing secure, scalable, and observable distributed systems.**

SKILLS

Languages & Framework

Java 11, 17, 21, 25 | Spring (Spring Boot, Spring MVC, Spring Data, Spring Security, Spring AOP) | Spring Cloud (Gateway, Eureka Service Discovery) | Python (working knowledge)

Cloud & DevOps

Apache Maven | Jenkins | GitHub Actions | Docker, Kubernetes | AWS - Lambda, ECS, EKS, S3, API Gateway, Serverless | IBM WebSphere

Security & Identity Management

Single Sign-On (SSO) | PASETO | Authentication & Authorisation (OAuth 2.0, OpenID Connect, JWT, SAML 2.0) | OWASP ZAP | Keycloak (IDM)

Architectural & Design Principles

Clean Code, Clean Architecture, SOLID | Hexagonal Architecture | Microservices | TDD, BDD, DDD | 12-Factor App

Databases & Persistence

Java Persistence API – JPA | MySQL | AWS Storage Services (DynamoDB, S3, OpenSearch) | MongoDB | PostgreSQL | DB2 | Cassandra (NoSQL) | Oracle Relational Database | Hibernate ORM

Messaging, Streaming & Cache

Apache Kafka | RabbitMQ | Ehcache | Redis

Testing & Monitoring

Unit Testing | Integration Testing | Load Testing | JUnit | Mockito | ELK Stack | Grafana | Prometheus

API,Tools & Collaboration

GitHub | GitLab | SDLC | Scrum | Jira | REST | SOAP | GraphQL | OpenAPI | Claude Code | Github Copilot

WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER – PEARSON LANKA – 29/04/2024 – 31/03/2025 – COLOMBO, SRI LANKA

Pearson is the world's leading learning company, with over 30,000 employees in more than 70 countries working to help people of all ages to make measurable progress in their lives through learning.

- Modernised 9+ Java Spring Boot microservices from **Spring Boot 2.x to 3.x**, improving performance and maintainability.
- Led **Amazon Aurora MySQL** upgrade across 15+ services with zero downtime using AWS CloudFormation.
- Enhanced data integrity and streamlined inter-service communication by modifying the **Autobahn Schema and SDK** across 10+ microservices, which facilitated seamless real-time data exchange.
- Utilised **AWS CloudWatch** for production monitoring and root-cause analysis on Linux-based environments.
- Deployed and maintained cloud-native Java microservices on AWS using **Docker and Kubernetes.**

- Built and maintained **GitHub Actions CI/CD** pipelines to automate builds, tests, and deployments.
- Reduced security risks by **80%** through proactive vulnerability scanning with Snyk.
- Mentored junior engineers through **code reviews,** technical guidance, and best practices.
- Collaborated with frontend teams (React/Angular) by designing **RESTful APIs** and ensuring seamless backend–UI integration.
- Partnered daily with a **US-based development team** across time zones through stand-ups, sprint planning, and retrospectives, keeping delivery aligned in a distributed Scrum setup.

SOFTWARE ENGINEER – AIR-RETAILER TECHNOLOGY LLC – 01/08/2022 – 31/03/2024 – DUBAI, UNITED ARAB EMIRATES

Air-Retailer is a new-generation IATA NDC-based Corporate Booking Tool and Expense Management System for small, medium and large corporate clients, Travel Management Companies, and Airlines that handle corporate travel.

- Engineered an event-driven logging mechanism using **Spring WebFlux and Apache Kafka** to asynchronously stream requests/responses to AWS S3, improving response efficiency by 40%.
- Integrated Singapore Airlines using **Amadeus Altéa NDC Standard (18.1) via SOAP** and the Aggregator pattern.
- Designed service boundaries for the Singapore Airlines booking integration using **Domain-Driven Design**, reducing coupling between services.
- Set up **Spring Cloud Gateway** as the single entry point for 25+ microservices, with Eureka (Netflix) service discovery for dynamic routing and load balancing.
- Overhauled shared utility module using **Feign Client and ControllerAdvice**, reducing duplicate code by 60%.
- Applied 1**2-Factor and microservice architecture** principles to improve scalability and maintainability.
- Standardised auditing across 25+ microservices with **Spring Data Auditing,** replacing manual per-service code and reducing API response time by 10%.
- Improved system observability using **Elasticsearch, Logstash, Kibana** and APM tools, reducing incident resolution time.

SOFTWARE ENGINEER (L1) – PEOPLE'S BANK / SILVERLAKE AXIS SDN. BHD./ JITRCS – 01/11/2021 – 31/07/2022 – COLOMBO, SRI LANKA

People's Bank, the second-largest commercial bank in Sri Lanka, has a network of 739 local branches and service centres, an asset base of LKR 1.873 trillion (2019), and over 14 million customers.

- Resolved 20+ critical production defects in the **core banking platform** serving 14.5M users.
- Optimised complex data-retrieval queries and custom scriptlets in **Jasper Reports (DB2),** cutting report generation time by 40%.
- Maintained enterprise applications, ensuring **regulatory compliance** and uptime stability.
- Enhanced event-driven communication using **Apache Kafka and RabbitMQ,** improving inter-service reliability and scalability.
- Deployed **production fixes** and enhancements across distributed banking modules.
- Worked closely with the **QA and DevOps teams**, resolved and tested critical bugs in the production environment and built teamwork.

ASSOCIATE SOFTWARE ENGINEER – TECHLEAD INTERNATIONAL (PVT) LTD – 01/01/2020 – 31/10/2021 – COLOMBO, SRI LANKA

Techlead International (PVT) Ltd is a company dedicated to advancing telecommunications solutions.

- Implemented **OAuth2 and Single Sign-On (SSO)** across 8+ microservices.
- Integrated the **Firebase push notification system**, improving system transparency by 20%.

TRAINEE SOFTWARE DEVELOPER – OPENARC SYSTEM MANAGEMENT (PVT) LTD – 14/05/2019 – 08/01/2020 – COLOMBO, SRI LANKA

- Developed **APIs and Oracle database triggers** on the SkyBank platform for Mercantile Investments and Finance PLC, improving third-party system integration by 30%.

EDUCATION AND TRAINING

01/05/2025 – 30/11/2026 Helsinki, Finland
MASTER OF ENGINEERING, INFORMATION TECHNOLOGY, NETWORKING AND SERVICES Metropolia University of Applied Sciences

Level in EQF EQF level 7 |

Thesis AI-assisted feedback system for handwritten math & science assignments - OCR + NVIDIA LLM integration on a MERN stack.

01/02/2021 – 31/03/2022 Colombo, Sri Lanka
B.SC. COMPUTING | SECOND CLASS HONOURS (1ST DIVISION) University of Gloucestershire

Level in EQF EQF level 6
